Founder & CEO

SS TECH

Oct 2015 - Present (5 years 6 months +)

Technology trend awareness as a skill refers to being mindful of the technology that is recently becoming popular and is readily accepted in the market or industry. It also encompasses one's ability to recognize and understand the usefulness of any such technology for the success of his business.

The industry-wide acceptance of a particular technology can be seen either as an opportunity or as a threat to an individual firm. Either way, the technology trend awareness skills serve as the most important asset. Ideal technology trend awareness skills would mean a person's ability to either correspond to the industry-wide technology adoption or surpass it.

Founder & Managing Director

G-MINE

Oct 2016 - Present (4 years 6 months +)

I am sure that many of you heard a lot of times about UI design, especially nowadays, when it is well known that technology is a very important part of people's life and there are a lot of requests for people with abilities in that domain, like web designers, developers, UI/UX designers, etc.

Actually, in reality, it is not that hard and I am sure that after reading this article you'll have a clear idea about all of these terms and what everything means.

Defining User Interface Design (UI)

Graphic Designer

Senior Graphic Designer

Mayil Studio

Sep 2016 - Feb 2017 (6 months)

Graphic designers, also referred to as graphic artists or communication designers, combine art and technology to communicate ideas through images and the layout of websites and printed pages. They may use a variety of design elements to achieve artistic or decorative effects.

Graphic designers work with both text and images. They often select the type, font, size, color, and line length of headlines, headings, and text. Graphic designers also decide how images and text will go together in print or on a webpage, including how much space each will have.

When using text in layouts, graphic designers collaborate with writers, who choose the words and decide whether the words will be put into paragraphs, lists, or tables. Through the use of images, text, and color, graphic designers may transform data into visual graphics and diagrams to make complex ideas more accessible.

Senior Graphic Designer

Mass Media Vision

Mar 2016 - Sep 2016 (7 months)

Image result for senior graphic designer work

Senior Graphic Designers should demonstrate a high level of proficiency in design, web and multimedia software and applications, such as Adobe Creative Suite.

Jan 2021

We have been experiencing Soil contamination. At the same time, we didn't preserve natural resources for current and future generations and lack knowledge about using the land efficiently. Healthy foods make us live a long life but healthy foods are not available here.

The aim of the project is to provide reliable access to food and increase livelihoods in an environmentally sustainable manner. Most of the rural communities in Sri Lanka are engaged in subsistence farming. However, poor farming practices such as the widespread use of fertilizers and agrochemicals have reduced soil fertility and caused environmental degradation. The permaculture program will provide knowledge of sustainable farming practices to rural communities while at the same time helping to increase their household nutrition and livelihoods.

Our Team IYATKAI KAAVALARKAL using the permaculture concepts through our model farming. From our farm, we cultivate the vegetables & fruits and sell those items directly to market and provide healthy and quality traditional foods by our own restaurant. At the same time, we will arrange aware sessions and training sessions about permaculture concepts for interested people. We are different from our competitors by providing 100% permaculture products, so this is ecofriendly to the environment and we give our permaculture knowledge to the interested people by consulting services.
